SOFTWARE DEVELOPER · CAMDENN.COM

Asheville, NC

☎ (803) 457-0740 | ✉ naviscam@gmail.com | 📄 github.com/yocamyio | 🔗 linkedin.com/in/naviscam

Summary

Creative problem solver with a focus on goals and exceeding them. Team player with a can-do attitude and phenomenal time management skills. Technical skills developed through project-based experience. Looking to apply knowledge of **JavaScript** and **React** as a software engineer.

Experience

camdenn.com

PORTFOLIO WEBSITE HTML5, CSS3, JAVASCRIPT (ES6 +)

github.com/yocamyio/camden-portfolio

- Created a beautiful interactive responsive portfolio website using HTML, CSS, JavaScript, and Bootstrap
- Strong experience on working with CSS Backgrounds, Layouts, Positioning, Animations, Grids, and Flexbox
- Deployed to github pages

Social Network

REACT, REDUX, MONGODB, NODE.JS

github.com/yocamyio/social-network

- Built a full stack social network application using MERN stack
- Created an extensive backend API with Express
- Involved JWT token and Passport.js to prevent unauthenticated users from accessing restricted routes and to realize user authentication
- Deployed to Heroku with a postbuild script

Client Management Application

REACT, REDUX

github.com/yocamyio/client-panel

- Developed React/Redux client management panel which uses Firebase for authentication and Firestore for storing data
- Implemented use of Babel, Webpack, ES6, and React-Router to aid in construction of application
- Responsible for implementing UI mockups, integrating third party react libraries, and handling/creating Redux store data.

Reduxstagram

REDUX

github.com/yocamyio/reduxstagram

- A simple photo app that utilizes the core ideas behind Redux, React-Router, and React.js
- Maintained state in the store and dispatched actions using Redux to achieve predictable application behavior
- Integrated Sentry to track errors and get context on what happened and used Redux DevTools to enable easy debugging and time travel

Blogging Application

GRAPHQL

github.com/yocamyio/graphql-blog

- Used Node.js and GraphQL to build a complete app backend that supports users, authentication, posts, a comment system, and more
- Utilized Apollo Client to communicate with GraphQL from blogging application
- Implemented testing with Jest to ensure product features behaved correctly as expected
- Used Prisma to store and access data from a production database

Harrahs Cherokee Casino and Resort

Cherokee, NC

POKER DEALER

2016 - 2018

- Maintain the accuracy of all financial transactions by ensuring the correct exchange of currency and chips, as well as, balancing the banks at the end of each shift
- Initiate courteous and friendly conversation with guests and provides game instructions to guests upon request or as assigned to encourage game activity
- Protects the integrity of the game through visual observation of all guests and game layout

Education

University of Georgia

Athens, GA

B.B.A. IN FINANCE

Aug. 2010 - May 2013
