CAMDEN NAVIS

WEB DEVELOPER

PROFILE

From the moment I produced "Hello World" in the console of my first application, I knew I was hooked into the world of software development. But software development has never been "just a job" for me, it's offered an engaging challenge to continually learn and improve my skills in creating high-quality software. What started with a simple "Hello World" has become a full-fledged passion that only gets more exciting as time goes by.

EDUCATION

University of Georgia
Bachelor of Business Administration (B.B.A.) in Finance 2010 - 2013

TECHNICAL EXPERIENCE

Portfolio Website
camdenn.com
- Created a beautiful responsive portfolio website using **HTML, CSS, JavaScript,** and **Bootstrap**

Project 1
Client Management App
- **React/Redux** client management panel which uses **Firebase** for authentication and **Firestore** for storing data
- Used **Babel, Webpack, ES6,** and **React-Router** to aid in construction of application
Project 2
Social Network
- Built a full stack social network app with **React, Redux, Node, & MongoDB**
- Created an extensive backend API with **Express**
- Deployed to **Heroku** with a postbuild script

Project 3
Blogging App
- Used **Node.js** and **GraphQL** to build a complete app backend that supports users, authentication, posts, a comment system, and more
- Utilized **Apollo Client** to communicate with GraphQL from blogging app
- Implemented testing with **Jest** to ensure product features behaved correctly as expected
